

## How to implement WN.C Assist

- 1) Acquire ClientId by making an enquiry at <http://worldnet.club/wncassist/>
- 2) Add the tag <app> and the script <http://cdn.worldnet.club/wnc-assistant/scripts/load-wnc-assistant.js> on the page

```
<app theme="orange" lang="en" prefercode="us" clientId="8"></app>
```

```
<script type="text/javascript" src="http://cdn.worldnet.club/wnc-assistant/scripts/load-wnc-assistant.js"></script>
```
